Jumbo Joint

Automatic pneumatic underpinner
with sliding nailing head

JUMBO JOINT AUTOMATICA 3 POSITIONS

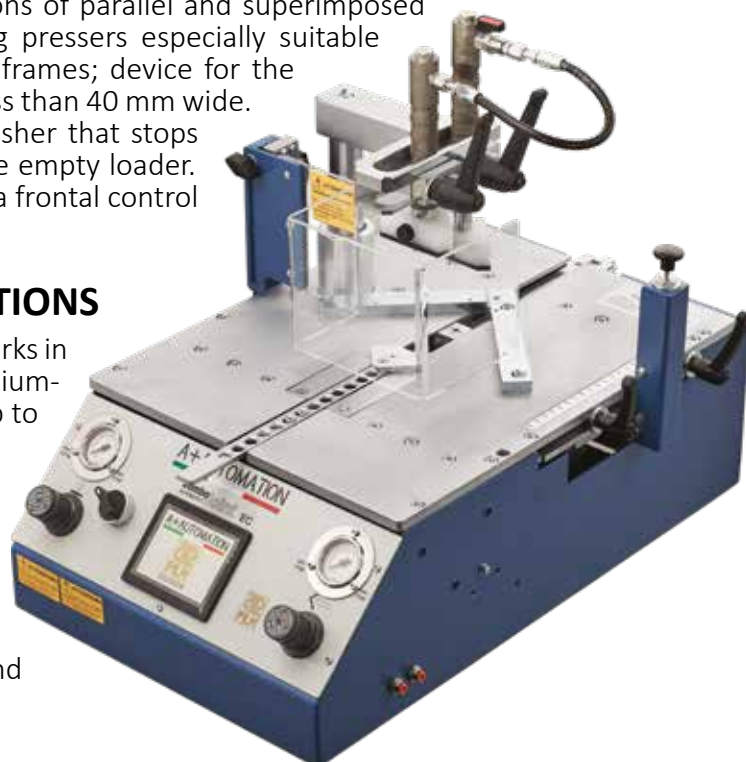

Pneumatic electric underpinner for joining small, medium and big frames with a minimum section of 8x5 and a maximum section of 110x100. The JUMBO JOINT AUTOMATICA is highly flexible and suitable for any type of moulding as it blocks the angle to join and through the staple insertion unit mounted on a sliding nailing head, it inserts the staples up to 3 standard positions. It can work in both manual and automatic mode and it's equipped with all the following independent adjustments: pushing strenght of the frontal presser; clamping strength and descent speed of the upper presser; tilting/opening angle adjustment of the fences; manual or automatic mode; insertion into 3 different positions of parallel and superimposed staples without unclamping the frame; self-levelling pressers especially suitable for clamping wide (more than 40 mm) and shaped frames; device for the exclusion of one of the pressers to work mouldings less than 40 mm wide. It's standardly equipped with a pneumatic staple-pusher that stops the machine when the staples are over indicating the empty loader. To operate easily, all controls and adjustments are in a frontal control panel including the display programmer.

JUMBO JOINT AUTOMATICA EC 2 POSITIONS

This is a simplified version of the model above, that works in automatic with 2 positions for inserting staples in medium-small mouldings, from 8x5 mm to 50x80 mm., and up to 110x100 mm in manual mode.

The JUMBO AUTOMATICA EC 2 POSITION is standardly supplied with upper single presser, fixed fence and spring staple-pusher.

The performances of the underpinner increase notably if it is provided with self-levelling pressers and adjustable fence, that for this model are optional.

ILLUSTRATED MODEL CORRESPONDS TO THE
JUMBO JOINT AUTOMATICA EC 2 POS.
IT IS EQUIPPED WITH OPTIONAL SELF-LEVELLING
PRESSERS DEVICE

JUMBO JOINT MANUALE EC

Pneumatic version of the previous model, it is the basic machine for framers and carpenters that works a wide range of profiles both for dimensions and sizes.

Easy to use, it's standard equipped with single presser, fixed fence and mechanical staple pusher.

The performances of the underpinner increase notably if it is provided with self-levelling pressers and adjustable fence, that for this model are optional.

Available with 120 or 150 mm staples insertion's stroke.
